Subject: RE: Duwamish Remediation Estimate

As we talked this morning, Fund 338 account 23449 (Environmental Remediation) had a balance of \$1.8M as of December 31, 2007. This amount is the net of original liabilities, \$2.5M (based on Ordinance #15333, see attached), and project 002109 LTD exp at 12/31/07.

Please review and advise what financial liability Airport should be reporting for environmental remediation activities.

Regarding the 2.5M for project 002109 (2007 – 2011) in Ordinance #15333, can you help find out how that amount was determined? This question was raised before but no clear answer.

Thanks.

Here is where the \$2.7 million estimate comes from. Also, there is a draft agreement among Boeing, City of Seattle, and King County to split the cost three ways. But, it is privileged information at this point. Let me know if you need to see it and I will see if we can get the needed permission.

I don't have the full cost estimate in writing. We do have the scope of work and preliminary cost estimate from Ecology's consultants. They estimated their costs at 2.4 M (see attached). This doesn't include the Ecology staff costs, which if included would likely bring the total to the 2.7 M.
